

# Academy of Learning for Life

I would like introduce you to this innovative, post-secondary, educational opportunity for intellectually and physically challenged individuals. Before high school graduation many educational and social opportunities are available to these students. After high school graduation these opportunities reduce, leaving the student with few ways to continue their education, to become a lifelong learner, and to socialize with people of their own age.

The **Academy of Learning for Life**, located in Lewisville, Texas, was established in 2012 to provide intellectually and physically challenged individuals with educational and social opportunities after high school. It is our mission to prepare each student to be a contributing member of society and to participate successfully in local, as well as global, communities. We guide our students to master academic skills while facilitating their social and emotional development. Our simple goal: Becoming Lifelong Learners.

Our rich curriculum includes mathematics, science, social studies, language arts/reading, computer technology, and music. All of our instructors are certified teachers who bring many years of experience in the classroom, a knowledge of the curriculum, and a love for their profession and students.

It is with a spirit of hope and much gratitude that I offer you the opportunity to help this continuing education program continued success. With your generous help, we will be better equipped to positively impact more students, their families, and our communities.
